

Sheep anti-h bcl-2

Product: Anti-human bcl-2 polyclonal antibody.

Description: Human hematopoietic malignancies are often characterized by gene rearrangements that deregulate gene expression. Antibodies to human bcl-2 (B cell leukemia/lymphoma 2) are directed against the gene isolated at the chromosomal breakpoint t(14;18) Bcl-2 which suppress programmed cell death (apoptosis) and appears to be modulated by association with bax, a cell death promoter.

Applications: Western Blots at 1:5,000, Immunoprecipitation – Empirical, Immunofluorescence 1:5000.

Presentation: 250 µg IgG purified.

Formulation: Provided as 0.2µm sterile filtered solution in phosphate buffered saline with 0.08% sodium azide.

Reactivity Reacts with human, rat and dog.

Storage: Antibodies should be stored at –20°C. Aliquot to avoid freeze/thaw cycles.

Stability: Antibodies are stable for one year from purchase if stored frozen.
