Sheep anti-EBNA-3A

Product: Anti-Epstein Barr Virus Nuclear Antigen 3A (EBNA3A) polyclonal antibody.

Description: EBNA-3A is a latent viral nuclear protein expressed in EBV transformed lymphoblastic cell lines. It is also found in some immunoblastic lymphomas *in vivo*. This viral nuclear protein is essential for EBV mediated transformation of B lymphocytes. The EBNA-3A functions as a transcriptional regulator though the target genes are currently unknown.

Applications: western blotting at 0.25-1.00 µg/ml

Presentation: 250 µg IgG purified

Formulation: Provided as 0.2µm sterile filtered solution in phosphate buffered saline with 0.08% sodium azide.

Reactivity: none

Storage: Antibodies should be stored at -20°C. Aliquot to avoid freeze/thaw cycles.

Stability: Antibodies are stable for one year from purchase if stored frozen.

Ordering Information:	Form Purified	Vial Size 250 µg	Catalog # F115P
