

## Anti-human-c-myc

**Product:** Anti-human c-myc monoclonal antibody.

**Description:** Human c-myc belongs to a family of 5 myc oncogenes. Amplification of c-myc has been found in several types of human tumors including breast and colon carcinomas. Induction of c-myc in cells grown in the appropriate growth factors or co-expression with survival genes, such as bcl-2 causes cell proliferation. In the absence of these factors, c-myc expression causes cell death. c-myc gene gives rise to at least two nuclear phosphoproteins of 64kDa and 67kDa.

**Isotype:** Mouse IgG2a

**Clones:** 8

**Applications:** Western Blot, Immunoprecipitation (Both with and without SDS)

**Presentation:** 100 µg IgG purified from ascites.

**Reactivity:** Cross reacts with human, rat, mouse, avian

**Formulation:** Provided as 0.2µm sterile filtered solution in phosphate buffered saline with 0.08% sodium azide.

**Storage:** Antibodies should be stored at -20°C. Aliquot to avoid freeze/thaw cycles.

**Stability:** Antibodies are stable for one year from purchase if stored frozen.
