

Lipid Phosphate Phosphatase Related Protein 3 . Rabbit Antigen Immunoaffinity Purified Polyclonal , Human

LPPRP3; Plasticity Related Gene 2

BACKGROUND

Phospholipid-mediated signalling on neurons provokes diverse responses such as neurogenesis, pattern formation and neurite remodelling. A recently uncovered novel set of molecules in the mammalian brain, named plasticity-related genes (PRGs) mediate lipid phosphate phosphatase activity and provide evidence for their involvement in mechanisms of neuronal plasticity.
